

**COMMERCIAL
HVAC REBATES**

HOW TO APPLY FOR COMMERCIAL REBATES

1

READ THE GENERAL REQUIREMENTS

to determine if you are eligible for a rebate.

2

REVIEW THE REBATE REQUIREMENTS

to make sure your new equipment meets all the requirements necessary to receive a rebate.

3

PURCHASE AND INSTALL

the qualifying product(s).

4

GATHER

all supporting documentation.

5

COMPLETE AND SUBMIT

your rebate application online at redding.conservationrebates.com.

Rebate eligibility and amounts are subject to change at any time.

COMMERCIAL REBATES AVAILABLE FOR:

GENERAL REQUIREMENTS

THE FOLLOWING CUSTOMER AGREEMENT REQUIREMENTS APPLY TO ALL COMMERCIAL REBATES:

- As a qualified Redding Electric Utility (REU) Customer, applicant agrees to indemnify the City of Redding, its City Council, commissions, officers, employees, volunteers, Strategic Allies, and agents from any claim, injury, liability, loss, cost, and/or expense or damage, including all costs and reasonable attorney's fees in providing a defense to any claim arising from this Rebate.
- Rebates are available only for existing buildings. New construction projects do not qualify.
- Equipment purchased for inventory or resale does not qualify for rebate funding. Equipment must be new. Used, rebuilt and/or refurbished equipment is not eligible.
- Rebate funding and offered product measures are subject to change at any time at the discretion of REU.
- Rebate funding is limited to 100% of the actual price of the project (including eligible equipment, labor, disposal, etc.), less any applicable sales tax or other fees.
- REU's Public Benefit Programs operate under a July-June annual budget calendar. Rebate funding is limited by the annual budget. Rebate applications are accepted on a first come, first served basis until the rebate budget is expended.
- Commercial utility customers are limited to receiving a maximum of \$250,000 in rebate funds in the program year (July 1st through June 30th). This includes incentives received through all REU programs.
- Commercial utility customers are limited to receiving a maximum of \$250,000 of rebate funds for similar measures installed at a single facility (stand-alone building). This limitation applies for a period of five (5) years.

Continued next page ►

- Submission of a rebate application constitutes an agreement by the applicant to purchase and install the indicated energy saving equipment or implement the indicated energy efficiency measures during the current REU program year.
- Submission of a rebate application indicates an agreement by the applicant to allow verification inspections by REU representatives or its third-party contractors of both the sales transaction and product or measure installation. Rebate funding may be held or denied based on REU's ability to verify that the project meets all program requirements.
- Applicants must allow REU or its third-party access to inspect the completed installation for up to two (2) years after a rebate check has been paid in order for REU to evaluate the effectiveness of the program.
- Installed equipment and/or measure(s) must be operational and producing energy savings or serving its intended purpose(s) for a minimum of five (5) years after the project has been completed. If changes occur that render the equipment or measure(s) inoperable or unable to serve the intended purpose(s) within the initial 5-year period, all or part of the rebate funding may be subject to repayment to REU.
- Submission of a rebate application serves as a certification by the applicant that they have received no other rebate(s) for the equipment and/or measures indicated on the application.
- Completion of the entire rebate application is required for rebate payment. The rebate application embodies the entire agreement between REU and the Customer.
- Applicant signature is required to certify that the information provided on the rebate application is true and correct.
- Rebate applications must be submitted within six (6) months of the project completion date as indicated by the final contractor invoice or the final building permit. Applications for self-installed projects must be installed within six (6) months of the purchase date shown on the receipt.

COMMERCIAL HVAC REBATES

If your business's heating, ventilating, and air conditioning (HVAC) equipment isn't keeping you comfortable, it may be time to switch it up. Proper heating and cooling keeps your business cool in summer and warm in winter, and makes sure fresh air circulates. REU offers rebate options at all price points for common heating, ventilation, and air conditioning (HVAC) equipment to help you keep your business at the right temperature, all year long.

Commercial HVAC equipment rebates available from REU include:

\$200
PER TON

COMMERCIAL HEAT PUMP

Save money and stay comfortable by upgrading your business's air conditioners. REU offers simple "buy, then apply" rebates for commercial air-cooled heat pumps up to 20 tons. A new heat pump can heat and cool more efficiently and significantly reduce your energy bill year-round. For water-cooled systems or if your system is larger than 20 tons, refer to REU's custom rebate program.

REBATE REQUIREMENTS ►

To qualify for our rebate, the following technical requirements must be met:

PERMITTED

Unit must meet all applicable building codes as indicated by a final permit.

RATED

Use the unit's energy efficiency ratings at AHRI-stated conditions to determine rebate eligibility. Equipment must meet the efficiency requirements for both the full load efficiency metric (EER) and part-load efficiency metric (IEER or SEER) per the table on the next page:

SUPPORTING DOCUMENTATION

The following supporting documentation must be submitted as part of your rebate application:

ITEMIZED INVOICE THAT INCLUDES:

- Customer name and installation address
- Vendor/contractor name and address
- Invoice number
- Installation date
- Product details, including:
 - › Product manufacturer(s)
 - › Product model number(s)
 - › Product serial number(s)
 - › Quantity purchased
- Total cost itemized by equipment price and installation costs
- Proof of full payment

COPY OF FINAL PERMIT

MANUFACTURER'S DATA SHEET OR AHRI CERTIFICATE

Indicating product capacity and efficiency for each item.

► EQUIPMENT EFFICIENCY REQUIREMENTS:

	DESCRIPTION	MINIMUM EFFICIENCY REQUIREMENTS		
COMMERCIAL PACKAGED AND SPLIT AIR-COOLED HP	HP Split Unit: < 5 Tons	SEER = 15	EER = 12.5	HSPF = 8.5
	HP Split Unit: 5 Tons	SEER = 15	EER = 12.5	HSPF = 8.5
	HP Package Unit: < 5 Tons	SEER = 15	EER = 12	HSPF = 8.2
	HP Package Unit: 5 Tons	SEER = 15	EER = 12	HSPF = 8.2
	HP Unit (Split or Package): 6-8.5 Tons	IEER = 12	EER = 11.1	COP = 3.4*
	HP Unit (Split or Package): 10 Tons	IEER = 12	EER = 11.1	COP = 3.4*
	HP Unit (Split or Package): 12-17 Tons	IEER = 11.4	EER = 10.7	COP = 3.2*
	HP Unit (Split or Package): 20 Tons	IEER = 10.4	EER = 10.1	COP = 3.2*
PACKAGED TERMINAL HP	PTHP: < 7,000 Btuh	N/A	EER = 11.2	COP = 3.3
	PTHP: 7,000 - 15,000 Btuh	N/A	EER = 10.2	COP = 3.1
	PTHP: >15,000 Btuh	N/A	EER = 9.2	COP = 3.0

*COP at 47°F db and 43°F wb

COMMERCIAL AIR CONDITIONER

Redding's summers can swelter – upgrading the air conditioner at your business will keep you cool and save you money at the same time. REU offers simple “buy, then apply” rebates for commercial air-cooled air conditioners up to 60 tons. For water-cooled systems or systems larger than 60 tons, refer to REU's custom rebate program.

\$175
PER TON

WEB-ENABLED PROGRAMMABLE THERMOSTAT

A web-enabled thermostat allows you to easily and remotely manage schedules and setbacks for your HVAC system. We've heard from many customers that programming smart thermostats is easier and more intuitive than the classic programmable versions. Many models allow you to control an entire building with multiple thermostats from a single point such as your computer, tablet or cell phone!

\$25
PER TON
CONTROLLED
BY THERMOSTAT

REBATE REQUIREMENTS

To qualify for our rebate, the following technical requirements must be met:

QUALIFIED

Existing thermostat must meet one of following criteria: is not programmable, sensors are out of calibration, used primarily in manual bypass mode, has complex control settings that are not user-friendly, or has a high level of user dissatisfaction resulting in suboptimal use of the thermostat.

ADVANCED

Unit(s) must be an advanced programmable thermostat that allows temperature set points and operating schedules to be monitored and set remotely via an internet connection.

SUPPORTING DOCUMENTATION

The following supporting documentation must be submitted as part of your rebate application:

ITEMIZED INVOICE THAT INCLUDES:

- Customer name and installation address
- Vendor/contractor name and address
