RESIDENTIAL ELECTRIC VEHICLE & CHARGER REBATES
HOW TO APPLY

1. READ THE GENERAL REQUIREMENTS
to determine if you are eligible for a rebate.

2. REVIEW THE REBATE REQUIREMENTS
to make sure your new equipment meets all the requirements necessary to receive a rebate.

3. PURCHASE AND INSTALL
the qualifying product(s) in your home.

4. GATHER
all supporting documentation.

5. COMPLETE AND SUBMIT
your rebate application online at redden.conervationrebates.com.
Rebate applications must be submitted within six (6) months of the project completion date as indicated by the final contractor invoice or the final building permit. Applications for self-installed projects must be installed within six (6) months of the purchase date shown on the receipt.

Rebate eligibility and amounts are subject to change at any time.

RESIDENTIAL REBATES AVAILABLE FOR:

- HVAC & THERMOSTATS
- WATER HEATING
- APPLIANCES
- BUILDING SHELL
- ELECTRIC VEHICLE & CHARGERS
THE FOLLOWING REQUIREMENTS APPLY TO ALL RESIDENTIAL REBATES:

- Qualifying products must be installed and operating in an existing residence receiving electricity in the City of Redding from Redding Electric Utility (REU).

- Applicant must be an existing Redding Electric Utility customer. New construction projects are not eligible.

- The rebate issued cannot exceed the purchase price of the installed product.

- Unless explicitly stated, all products must be owned by the customer. Rented or leased products are not eligible for a rebate.

- Rebates are offered on new products only. Used or refurbished items are not eligible for a rebate.

- Rebate applications must be submitted within six (6) months of the purchase date of the new product or the verifiable completion date of the home upgrade project.

- Funds for rebate incentives are limited. REU reserves the right to change and/or terminate incentives at its own discretion based on the availability of funds.

- The City of Redding reserves the right to verify the purchase and installation of home upgrades and appliances. If the City of Redding is unable conduct an inspection to verify purchase and/or installation, the rebate check may not be issued. If a rebate has been paid and an inspection cannot be conducted, the paid rebate will be subject to repayment to the City of Redding.

- Applicant must allow access to REU, or its third-party inspector, to review the completed installation for up to two (2) years after a rebate check has been paid in order for REU to evaluate the effectiveness of the program.

- Rebate(s) will be issued as a check made payable to the account holder or homeowner. Checks will not be issued to third parties or contractors.

- The City of Redding reserves the right to inspect all submissions to determine eligibility. Fraudulent requests for rebates or duplicate submissions will be denied. Any paid rebates will be subject to repayment to REU if fraudulent activity is determined.

- Applications submitted with missing or incomplete information will be subject to processing delays and/or denial of the rebate request.

- Rebate applications submitted may take up to 30 days to be processed and approved. Rebate checks for approved rebates will be issued within ten (10) weeks of the date of receipt. Rebate approval is at the sole discretion of REU, and submission of a rebate application does not guarantee rebate approval.

- In order to receive a rebate, applicants must fulfill application requirements, meet rebate criteria, and sign the customer agreement.
RESIDENTIAL ELECTRIC VEHICLE AND CHARGER REBATES

Through our Electric Vehicle (EV) & Charger Rebate Program, Redding Electric Utility (REU) offers rebates to help you save money when purchasing a new, qualified electric vehicle or installing a Level 2 electric vehicle charging station in your home.

Rebates will be issued in the form of a check to the customer. Items that are eligible for electric vehicle rebates include:

- $1000 for purchase or lease of qualified electric vehicle
- $500 for installation of home vehicle charging station

In addition to rebates and incentives offered through REU, Federal and State rebates for electric vehicle purchases and leases may be available.

Federal Tax Credit: www.fueleconomy.gov
Clean Vehicle Rebate Project: www.cleanvehiclerebate.org

If you have a specific question about electric vehicles or electric vehicle charging stations, contact REU at PEV@reupower.com.
Not all Electric Vehicles (EVs) are created equal. Plug-in Hybrid Electric Vehicles (PHEV) use both an electric motor and a gasoline engine, while Battery Electric Vehicles (BEV) use strictly electric motors powered by batteries without a backup gasoline engine. Although the purchase price of an electric vehicle tends to be higher than traditionally-fueled models, they significantly reduce the amount you spend on fuel and need less maintenance because they don’t require oil changes or tune-ups.

As you contemplate the purchase or lease of a new electric vehicle, consider the number of miles you drive in a typical day, whether you embark on many long-distance road trips, and how your budget may impact your selection. Electric vehicles also require a way to charge; while they can plug into standard household outlets, they will charge much faster using purpose-built chargers.

**REBATE REQUIREMENTS**

To qualify for our rebate, the following conditions must be met:

**REGISTERED**

Vehicle must be registered with the DMV at the residence of the active REU account listed on the application (the registered owner name does not have to match REU account holder but must permanently reside at the address of the REU service account).

**LIMIT**

Limit two (2) new electric vehicle incentives per residential account.
REBATE REQUIREMENTS (CONTINUED)

NEW OR LEASED

Only new first-time purchases or leases of electric vehicles are eligible:

- An electric vehicle is defined as either a plug-in hybrid vehicle (e.g. Chevy Volt) or a full battery electric vehicle (e.g. Chevy Bolt).
- Vehicles must be able to charge via plugging into an electrical outlet.
- Motorcycles, electric scooters, and traditional hybrid vehicles are NOT eligible.
- Eligible vehicles are listed at: cleanvehiclerebate.org/eng/eligible-vehicles.

SUPPORTING DOCUMENTATION

The following supporting documentation must be submitted as part of your application:

- CURRENT ELECTRIC VEHICLE REGISTRATION
- BILL OF SALE OR LEASE CONTRACT

Copy of the bill of sale or lease contract for the new electric vehicle
There are many options for charging your electric vehicle, from public charging stations to charging stations installed at your home or business.

- Level 1 chargers use a standard 120V outlet, and 1.3-1.9 kW. Provides 2-5 miles per hour of charge.
- Level 2 chargers use 240V and can reach up to 19.2 kW. Provides 10-20 miles per hour of charge.
- Level 3 chargers are direct current (DC) chargers with 208-600V and operate on 50-150 kW depending on brand and type. Provides 120-160 miles per hour of charge.

REU offers rebates for Level 2 chargers, which take around four (4) hours to recharge a fully depleted battery, depending on the total capacity of your electric vehicle’s battery.

Regardless of the electric vehicle charging station you choose to install, be sure to use a licensed electrician and follow all required building permitting processes.

### REBATE REQUIREMENTS

To qualify for our rebate, the following conditions must be met:

**MAXIMUM REBATE**

Maximum rebate amount cannot exceed the installation price.

**PERMITTED**

A City of Redding building permit and a successful final inspection is required to receive a rebate.

*Continued next page*
