

COMMERCIAL ELECTRIC VEHICLE & CHARGER REBATES

HOW TO APPLY FOR COMMERCIAL REBATES

1

READ THE GENERAL REQUIREMENTS

to determine if you are eligible for a rebate.

2

REVIEW THE REBATE REQUIREMENTS

to make sure your new equipment meets all the requirements necessary to receive a rebate.

3

PURCHASE AND INSTALL

the qualifying product(s).

4

GATHER

all supporting documentation.

5

COMPLETE AND SUBMIT

your rebate application online at redding.conservationrebates.com.

Rebate eligibility and amounts are subject to change at any time.

COMMERCIAL REBATES AVAILABLE FOR:

GENERAL REQUIREMENTS

THE FOLLOWING CUSTOMER AGREEMENT REQUIREMENTS APPLY TO ALL COMMERCIAL REBATES:

- As a qualified Redding Electric Utility (REU) Customer, applicant agrees to indemnify the City of Redding, its City Council, commissions, officers, employees, volunteers, Strategic Allies, and agents from any claim, injury, liability, loss, cost, and/or expense or damage, including all costs and reasonable attorney's fees in providing a defense to any claim arising from this Rebate.
- Rebates are available only for existing buildings. New construction projects do not qualify.
- Equipment purchased for inventory or resale does not qualify for rebate funding. Equipment must be new. Used, rebuilt and/or refurbished equipment is not eligible.
- Rebate funding and offered product measures are subject to change at any time at the discretion of REU.
- Rebate funding is limited to 100% of the actual price of the project (including eligible equipment, labor, disposal, etc.), less any applicable sales tax or other fees.
- REU's Public Benefit Programs operate under a July-June annual budget calendar. Rebate funding is limited by the annual budget. Rebate applications are accepted on a first come, first served basis until the rebate budget is expended.
- Commercial utility customers are limited to receiving a maximum of \$250,000 in rebate funds in the program year (July 1st through June 30th). This includes incentives received through all REU programs.
- Commercial utility customers are limited to receiving a maximum of \$250,000 of rebate funds for similar measures installed at a single facility (stand-alone building). This limitation applies for a period of five (5) years.

Continued next page ►

- Submission of a rebate application constitutes an agreement by the applicant to purchase and install the indicated energy saving equipment or implement the indicated energy efficiency measures during the current REU program year.
- Submission of a rebate application indicates an agreement by the applicant to allow verification inspections by REU representatives or its third-party contractors of both the sales transaction and product or measure installation. Rebate funding may be held or denied based on REU's ability to verify that the project meets all program requirements.
- Applicants must allow REU or its third-party access to inspect the completed installation for up to two (2) years after a rebate check has been paid in order for REU to evaluate the effectiveness of the program.
- Installed equipment and/or measure(s) must be operational and producing energy savings or serving its intended purpose(s) for a minimum of five (5) years after the project has been completed. If changes occur that render the equipment or measure(s) inoperable or unable to serve the intended purpose(s) within the initial 5-year period, all or part of the rebate funding may be subject to repayment to REU.
- Submission of a rebate application serves as a certification by the applicant that they have received no other rebate(s) for the equipment and/or measures indicated on the application.
- Completion of the entire rebate application is required for rebate payment. The rebate application embodies the entire agreement between REU and the Customer.
- Applicant signature is required to certify that the information provided on the rebate application is true and correct.
- Rebate applications must be submitted within six (6) months of the project completion date as indicated by the final contractor invoice or the final building permit. Applications for self-installed projects must be installed within six (6) months of the purchase date shown on the receipt.

COMMERCIAL ELECTRIC VEHICLE & CHARGER REBATES

Through our Electric Vehicle (EV) & Charger Rebate Program, Redding Electric Utility (REU) offers rebates to help you save money when purchasing a new, qualified electric vehicle or installing a Level 2 electric vehicle charging station.

Items that are eligible for electric vehicle rebates include:

In addition to rebates and incentives offered through REU, Federal and State rebates for electric vehicle purchases and leases may be available.

Federal Tax Credit: www.fueleconomy.gov

California Clean Vehicle Rebate Project: www.cleanvehiclerebate.org

If you have a specific question about electric vehicles or electric vehicle charging stations, contact REU at PEV@reupower.com.

UP TO
\$1000
REBATE

NEW ELECTRIC VEHICLE

Not all Electric Vehicles, also known as EVs, are created equal. Plug-in Hybrid Electric Vehicles (PHEV) use both an electric motor and a gasoline engine, while Battery Electric Vehicles (BEV) strictly use electric motors powered by batteries without a backup gasoline engine. Although the purchase price of an electric vehicle tends to be higher than traditionally-fueled models, they significantly reduce the amount you spend on fuel and need less maintenance because they don't require oil changes or tune-ups.

As you contemplate the purchase or lease of a new electric vehicle, consider the number of miles it will be driven in a typical day, whether it will embark on many long-distance road trips, and how your budget may impact your selection. Electric vehicles also require a way to charge; while they can plug into standard outlets, they will charge much faster using purpose-built chargers.

REBATE REQUIREMENTS

To qualify for our rebate, the following technical requirements must be met:

NEW OR LEASED

Only new first-time purchases or leases of electric vehicles are eligible.

PLUG-IN HYBRID OR ELECTRIC

Vehicle must be a plug-in hybrid vehicle or an all-electric vehicle that is able to charge via plugging into an electrical outlet.

EXCEPTIONS

Motorcycles, electric scooters, and traditional hybrid vehicles are NOT eligible.

LIMIT

Limit ten (10) electric vehicles every five (5) years.

ELIGIBILITY

Eligible vehicles are listed at: cleanvehiclerebate.org/eng/eligible-vehicles

SUPPORTING DOCUMENTATION

The following documentation must be submitted with your rebate application:

COPY OF THE BILL OF SALE OR LEASE CONTRACT FOR THE NEW ELECTRIC VEHICLE

COPY OF THE DMV VEHICLE REGISTRATION

New vehicle dealer notice temporary identification is acceptable if it displays name and address of owner/lease holder (the registered owner name does not have to match account holder, but must be permanently employed at the address of the REU service account or must be in the name of the business located at the REU service account address).

NEW ELECTRIC VEHICLE

ELECTRIC VEHICLE CHARGING STATION

UP TO
\$3000
REBATE

There are many options for charging your electric vehicle, from public charging stations to charging stations installed at your place of business:

- Level 1 chargers use a standard 120 V outlet, and 1.3-1.9 kW. Electric vehicles will get around 2-5 miles per hour of charge.
- Level 2 chargers use 240 V and can reach up to 19.2 kW. Electric vehicles will get around 12-20 miles per hour of charge.
- Level 3 chargers are direct current (DC) chargers with 208-600 V and operates on 50-150 kW (specifics depend on brand and type). Electric vehicles will get around 120-160 miles per hour of charge.

Redding Electric Utility offers rebates for Level 2 chargers, which take around four (4) hour to eight (8) hours to recharge a fully depleted battery, depending on the total capacity of your electric vehicle's battery.

REBATE REQUIREMENTS

To qualify for our rebate, the following technical requirements must be met:

VOLTAGE

Electric vehicle charger must be Level 2 (208/240V) or greater.

COUPLER

Must utilize SAE J1772, CHAdeMO, or TESLA equivalent charge coupler.

CERTIFIED

Charger(s) must be UL certified.

HARDWIRED

Charger(s) must be hardwired and permanently mounted on a wall or pedestal.

LIMIT

Limit ten (10) electric vehicle chargers every five (5) years.

SUPPORTING DOCUMENTATION

The following documentation must be submitted with your rebate application:

INVOICE(S)

Indicating equipment and installation costs of electric vehicle chargers installed. Invoice(s) must specify purchase and installation dates, installation location(s), and equipment details.

A COPY OF THE ELECTRIC VEHICLE CHARGER TECHNICAL SPECIFICATION SHEET FROM THE ELECTRIC VEHICLE CHARGER MANUFACTURER

Indicating model name/designation (matching that on the invoice/sales receipt), and specifying voltage of electric vehicle charger units and other technical data (if no data sheet is available, provide specifications in a typewritten sheet).

CITY OF REDDING BUILDING PERMIT

and a successful final inspection is required.
