

REU Quick Facts

743

Miles of 12,000 volt power lines. That's enough to stretch from Redding to Mexico!

61

Square miles of service territory. Compare that to San Francisco at only 47 square miles.

44,358

Metered services with a population of 92,000

13

Substations/Switchyards

186

Dedicated employees that put the customer first.

Low Income Assistance Programs

2.4M

Annual expenditure - Low Income Weatherization Program, CARES Program and Rate Discount Program.

14MW

370 customers have installed solar totaling 14MW. An additional 200 applications were either approved or pending adding a potential for an additional 5.8MW.

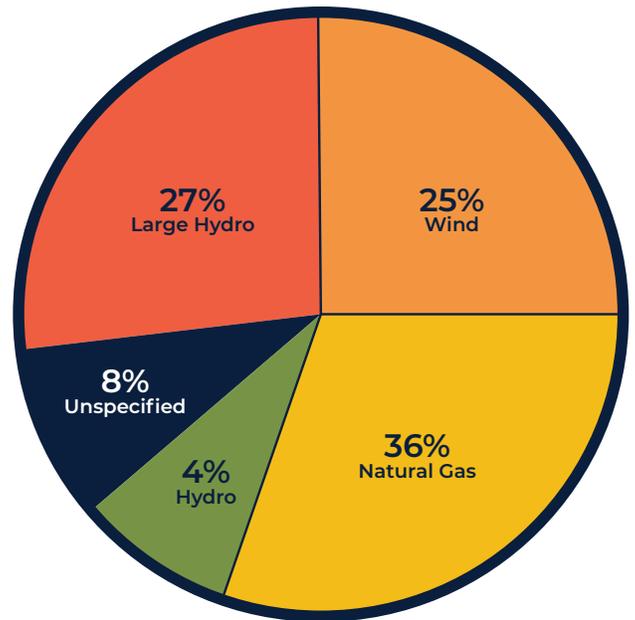

23.2M

Committed greenhouse gas reduction programs. Examples include low income energy efficiency, building and transportation electrification and shade trees.

11.2M

COVID-19 Economic Response Plan Distribution to customers.

2018 Power Content Label

56%

Zero Carbon Energy Portfolio

Wildfire Mitigation Plan

Committed \$40M Over the Next 10 Years

Prevention & Improved Response Program

**19**
Fire Personnel**3**
Public Works Vegetation Removal Crew**500**
Goat Task Force for Vegetation Control

Emergency Operations

**EOP**
Modeled after the FEMA Incident Command System with a goal of improving Emergency/Departmental Operations Center.

Technological Solutions

**AVL Automatic Vehicle Location**
First Responder and Electric Utility vehicles.**Emergency Communications**
City-wide radio system with Police and Fire as well as a Mobile Command Center.**Camera Systems**
Early wildfire detection and notification - 40+ Cameras w/live feed and UAV's with infrared cameras. IQ Firewatch technology for early detection of wildfire smoke.**Aerial Imagery**
Mapping of vegetation canopy.

Capital Improvements

**10 Year Plan**
Enhanced inspections of lines and infrastructure, improved tracking and monitoring of assets and plan implementation.
